

OPERATIONAL PERFORMANCE REVIEW

Namma Yatri Strategy & Optimization

Bridging the ₹900.39K Revenue Gap

Prepared By

DIWAKAR KUMAR

The Performance Pulse

Analyzing the core metrics and friction points that define current operational efficiency.

CONVERSION FUNNEL SNAPSHOT

Total Intent: 2,161 Searches

1,455 Quotes

Generated estimates for customers. Represents a ~67% Search-to-Quote conversion rate.

983 Trips

Successfully completed rides. Fulfillment remains the primary bottleneck for growth.

PAYMENT ECOSYSTEM DISTRIBUTION

Highly balanced payment ecosystem; multi-gateway stability is critical for conversion.

THE ABANDONMENT LEAKAGE

40.91%

Abandonment Rate

Critical Revenue Drain

Nearly 41% of users leave the app before booking. This friction point is the single largest contributor to the ₹900.39K missed opportunity.

Impact: High drop-offs in the estimate-to-quote phase suggest supply unavailability or pricing mismatch.

GEOGRAPHIC PERFORMANCE MATRIX

Highest Revenue

Highest Searches

Highest Cancellations

Market Baseline

Revenue Leader: Bangalore South

Volume Engine: Ramanagara

Friction Zone: Mahadevapura

PEAK DEMAND: 12 AM – 1 AM

Insight: Midnight surge indicates shift-end demand. Supply density must be optimized for this window to prevent late-night abandonment.

THE RELIABILITY GAP

Mahadevapura Dynamics

Mahadevapura consistently records the highest cancellation rates. This bottleneck is often driven by heavy traffic friction and driver "dead miles."

Opportunity Gap: 1.178

This score indicates high potential market capture if reliability issues are addressed via localized incentives.

BUSINESS IMPACT MATRIX

Category	Metric	Value	Status	Strategic Action
Conversion	Abandon Rate	40.91%	CRITICAL	Increase driver density in Ramanagara
Growth	Success %	45.49%	WARNING	Midnight supply optimization (12 AM)
Financial	Revenue Loss	₹900.39K	CRITICAL	Prioritize B-South high-value trips
Reliability	Cust. Cancel	7.27%	HEALTHY	Focus on Mahadevapura ETAs

STRATEGIC DECISION PILLARS

Supply Density

Deploy localized driver incentives in high-search zones like Ramanagara.

Dynamic Pricing

Implement late-night surge (12-1 AM) to attract supply during peak demand.

Zone Optimization

Reduce "Friction Gap" in Mahadevapura via reliability bonuses.

Path to Recovery

Targeting ₹900.39K in Captured Revenue by
Q3

Questions?
