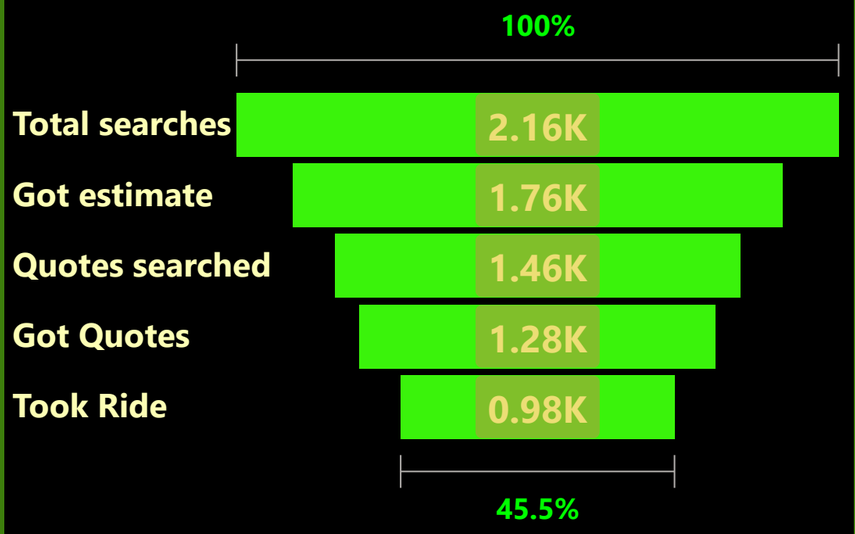
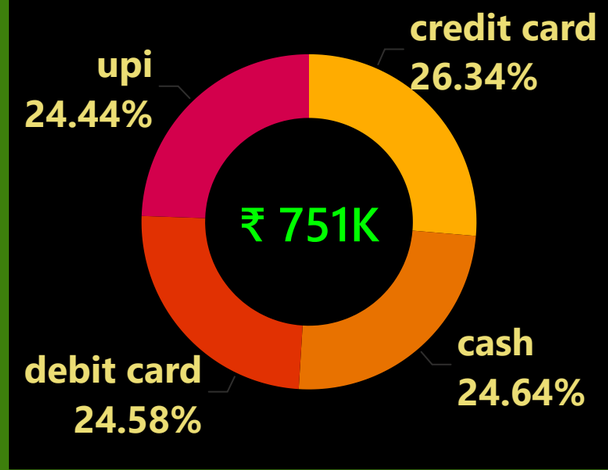
Conversion Pattern



Payment Distribution



Select all | Cancellation | Funnel | Peak Hours

The dashboard shows a total of 2.16K searches resulting in 0.98K completed rides, representing a 45.5% conversion rate.
Observation: The most significant drop-off occurs between "Quotes Searched" and "Took Ride," suggesting that price points or driver proximity may be influencing the user's final decision.

Analytical Workaround: While temporal (time-based) conversion analysis yields a flat 100% due to missing timestamps for uncompleted quotes, I have alternatively visualized the conversion ratio by Pickup Assembly (Location). Unlike time, location data is available for all searches, providing a much more accurate reflection of where we are losing potential customers after they check the quotes.
